Who are we?

- DVS is a technical-scientific society which is involved with all matters concerning joining, cutting and coating. Our objective is the extensive promotion of welding and all the processes related to it.
- With our cooperative work relating to joining technology, we ensure that the latest results are reflected in research, education, technology, standardisation and certification.
- Our society has around 19,000 members. They are looked after by 13 state branches and 74 district branches nationwide.
- With more than 300 DVS educational establishments, we offer comprehensive training and further education possibilities throughout the country.
- In a large number of lectures, conferences, colloquia and other specialist events, we impart knowledge close to practice year after year.
- Around 2,300 experts in joining technology are active on our Technical Committee and in the nearly 200 working groups, subgroups and working parties associated with it.
- In close cooperation with the Research Association for Welding and Allied Processes of DVS, we guarantee research results close to practice.
- Due to cooperation measures with national and international bodies and organisations, we guarantee that the results of our work are taken into consideration, also at an international level.

Your advantages as a corporate member:

- Free and unrestricted access to the DVS set of rules with its technical bulletins, technical codes and guidelines
- Access to our teaching media and trainer guides for company-internal and uncommercial use
- The possibility of incorporating requirements from practice directly into our cooperative work relating to joining technology
- Collaboration in national and international expert groups and bodies of DVS
- Certification possibilities for personnel, processes, materials and systems
- Special rates at DVS events
- Discounts on the products from DVS Media GmbH
- The latest first hand specialist and society information
- "DVS-Magazin" (free of charge)

Secure your competitive advantages!

Our network allows you to make connections to manufacturers of devices and systems for joining technology as well as to manufacturers of materials, consumables and process substances. You can exchange ideas with users from all fields of industry and skilled trades and can establish contacts with service companies from education, research and technology.
